24998	7590	03/16/2007		
DICKSTEIN SHAPIRO LLP 1825 EYE STREET NW Washington, DC 20006-5403			EXAMINER DAVIS, DAVID DONALD	
			ART UNIT 2627	PAPER NUMBER

SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	03/16/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/765,394	Applicant(s) NAMIKI, TOMOKAZU	
	Examiner David D. Davis	Art Unit 2627	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on October 19, 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Specification

1. The title of the invention is *still* not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: --Disk Tray Unit Having Including A Plurality Of Disk Holding Members Continuously Arranged On The Peripheral Wall Of The Recess--..

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Mitsui et al (US 5,930,218). As per claim 1, Mitsui et al shows in figures 1 and 2 a disk tray unit 10 movably attached to a main body of a disk rotational device for conveying a disk from a predetermined position outside the main body through an opening formed on a frame of the main body to a disk rotating position inside the main body. Also shown in figure 1 and 2 of Mitsui et al is unit 10 conveying the disk from the disk rotating position inside the main body through the opening to the predetermined position outside the main body. Unit 10 includes a tray 12, as shown in figure 1, a recessed portion 40-1 for accommodating the disk; and a disk holding member 40-6/40-7/40-9/40/13 continuously formed on a peripheral wall of the recessed portion. The disk holding member having a front end of a smooth shape without unevenness and projecting toward

an inner side of the recessed portion so that the front end faces a portion of a periphery of the disk accommodated in the recessed portion.

As per claim 2, Mitsui et al shows in figure 1 a plurality of the disk holding members. The disk holding members are continuously arranged on the peripheral wall of the recessed portion and integrally forming the edge of the smooth shape without unevenness and projecting toward the inner side of the recessed portion. As per claim 3, Mitsui et al shows in figure 1 the disk holding members are arranged to cover the periphery of the disk. As per claim 4, Mitsui et al shows in figure 1 the front end is in a shape of an arc forming a portion of a circle or an ellipse. As per claim 5, Mitsui et al shows in figure 1 at least a side of the disk holding member facing the disk forms a rounded surface.

As per claim 1, Mitsui et al shows in figures 1 and 2 a disk rotational device for driving a disk to rotate at a disk rotating position. The device, as shown in figure 1, includes a main body having a frame with an opening and a disk tray unit movably attached to the main body for conveying the disk from a predetermined position outside the main body through the opening on the frame to the disk rotating position inside the main body. The unit 10 also conveys the disk from the disk rotating position inside the main body through the opening to the predetermined position outside the main body. The disk tray unit 10 includes a tray 12 including a recessed portion for accommodating the disk; and a disk holding member 40-6/40-7/40-9/40/13 formed on a peripheral wall of the recessed portion. The disk holding member 40-6/40-7/40-9/40/13 has a front end of a smooth shape without unevenness and projecting toward an inner side of the recessed portion so that the front end faces a portion of a periphery of the disk accommodated in the recessed portion.

As per claim 7, Mitsui et al discloses that the disk is an information storage medium. Mitsui et al discloses shows in figure 2 that the disk rotational device further includes a head unit arranged inside the frame and at least performs reproduction of information on the storage medium among operations of recording the information on the information storage medium, deleting the information on the information storage medium, and reproducing the information on the information storage medium. As per claim 8, Mitsui et al discloses that the information storage medium is an optical disk; and the head unit is an optical pickup.

Response to Arguments

4. Applicant's arguments filed October 19, 2006 have been fully considered but they are not persuasive. Applicant asserts in the first full paragraph on page 6, that “each of the tongue parts are spaced at intervals around the recessed portion of the disk tray, they do not anticipate the disk holding member continuously formed on a peripheral wall of the recessed portion.” Just as applicant discloses multiple continuously formed disk holding members having the edge of a smooth shape without unevenness, Mitsui et al shows multiple continuously formed disk holding members having the edge of a smooth shape without unevenness.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 2627

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David D. Davis whose telephone number is 571-272-7572. The examiner can normally be reached on Monday thru Friday between 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dwayne D. Bost can be reached on 571-272-7023. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
